Safety Manual

The following precautions need to be taken when using any hand tools in the RPI Centrifuge Lab in order to promote a safe work environment and keep accidents as small and as infrequent as possible. In general, only use a tool for what it was originally designed to do. Also, be careful to inspect the tool before using it, as older and worn out tools become much more dangerous than a tool in good condition. It is also important to wear the proper safety protective equipment such as gloves or safety glasses whenever using any hand tools. Always remember to keep yourself and the other people working around you in mind when working with tools in the lab. It is important to be aware of your surroundings, not being aware of the position of coworkers is no excuse for an accident occurring in the lab.

- Screwdriver:**
- Never use a screwdriver as a chisel, as it might shatter and become a hazard.
 - Always make sure the handle and shaft do not have any cracks and are in good condition before using a screwdriver.
 - Never use a screwdriver as some sort of pry bar.
 - Always take the time to find the right sized and right type screwdriver for the job, as this will make your work go by much quicker and also ensure the job gets done the safest way possible.

- Hammer:**
- Never use a hammer which has a loose or cracked handle, as the head may fly off and become a hazard.
 - Ensure that the hammer is both the proper type and size for the job you are performing, as this will make your work go by much quicker and also ensure the job gets done the safest way possible.
 - Never use a hammer with a chipped, cracked, or broken claw.
 - When using a hammer, keep your motions short and compact, and try to avoid longer swings of the hammer. This will not only cause you to be more accurate with what you strike with the hammer, this will decrease the chance of you hitting something or somebody by accident at the top of the hammer stroke.

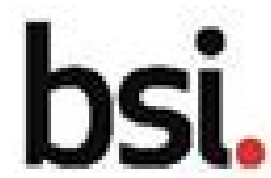

- Saw:**
- Ensure that the saw's teeth are sufficiently sharp, as a dull tool is much more dangerous than a sharp tool.
 - Always be careful to cut in a direction that puts yourself and others out of harm whenever possible.
 - Always use a vice or other means to secure your work, as this will make it both easier and safer to make a cut with a saw.

Workplace Health and Safety Management System

The Workplace Health and Safety Management System (WHSMS) is a set of behaviours and documents to help CSSU staff manage risks encountered in the course of their work. This manual is part of the WHSMS alongside policies provided by CSSU, and the behaviours and responsibilities expected of staff.

Workplace Health and Safety Policies

CSSU has developed workplace health and safety policies to protect the health, safety and welfare of CSSU staff and stakeholders. The policies describe the roles of staff and stakeholders in championing health and safety, and the processes by which they will do so.

Staff may consult the Workplace Health and Safety Policies for information on the responsibilities of Health and Safety Representatives (HSRs) and the Health and Safety Committee (HSC). The policies contain steps to identify, report and minimise risks, the escalation process to eliminate future risks and the responsibilities of the organisation, staff and stakeholders. Policies can be found here [add url]

CEO Behaviours and Responsibilities

The CEO will formally approve and enforce the WHSMS, and put measures in place to support and develop staff health and safety. The CEO will, as far as is reasonably practicable, provide and maintain a working environment free of risks, in accordance with legislation.

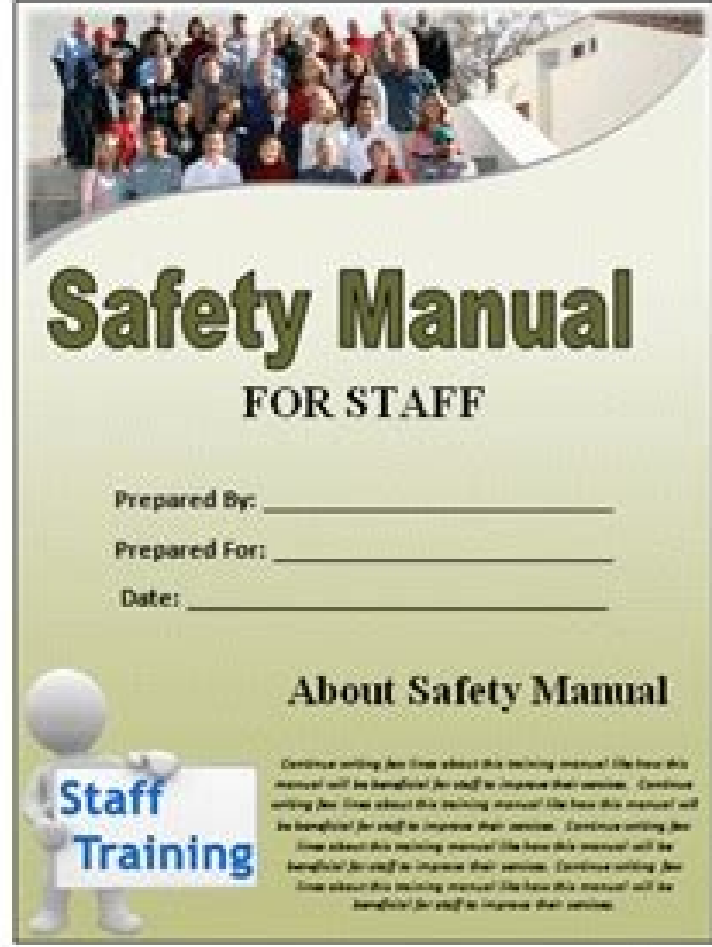

Staff Behaviours and Responsibilities

CSSU provides this manual and all policies to employees at commencement of their employment. Existing employees receive a copy of each document whenever a new version is produced. Staff must familiarise themselves with all documents as part of their responsibility to maintain a safe work environment. A copy of this manual is available at every Service.

Staff have a duty to keep themselves and others safe. In addition to the steps outlined in this manual and the Workplace Health and Safety Policy, staff must display common sense and risk awareness at all times. A positive staff attitude towards workplace safety is an integral part of the WHSMS.

CSSU provides this manual and all policies to employees at commencement of their employment. Existing employees receive a copy of each document whenever a new version is produced. Staff must familiarise themselves with all documents as part of their responsibility to maintain a safe work environment. A copy of this manual is available at every Service.

Staff have a duty to keep themselves and others safe. In addition to the steps outlined in this manual and the Workplace Health and Safety Policy, staff must display common sense and risk awareness at all times. A positive staff attitude towards workplace safety is an integral part of the WHSMS.

INTRODUCTION
Dedicated to the safety of all staff members, this manual provides essential information and guidelines for maintaining a safe work environment. It is the responsibility of every employee to adhere to these instructions and procedures to prevent accidents and injuries.

ROUTINE TASKS
This section outlines the standard procedures and protocols for various tasks performed in the workplace. It includes detailed instructions on equipment use, safety checks, and reporting procedures to ensure consistency and safety in all operations.

INDIVIDUAL RESPONSIBILITIES
Each employee has a role to play in maintaining workplace safety. This section defines the specific responsibilities for different roles, from management and supervisors to individual staff members, ensuring everyone understands their part in creating a safe environment.

It must be modified to adapt to enthusiasm and any applicable legislation in your place that obtains in the manual; the manual manual It contains the following headers and content (more than 250 pages): 2 Introduction to the Manual5 OHS Policy and happy procedures of OHS policy and sample of general procedure OHS POLICYSAMPLE MANUAL MANUAL MANUAL OF POLICE AND RESPONSIBLE /FALLS /WORK IN HEIGHTSRETURN -TO-WORK COORDINATOR GUIDELINESOHS INSPECTION Verification lists Storage and Manutables Mé © All work Safe Declarations Incident/First Aid reports Working sheets of Management of Form CC0/OLI2020/Pixabay The proposal of health and safety policy in the place of work, according to what is established by OSHA (The Occupational Safety and Health Administration) are six times: to prevent injuries and diseases that arise from the workplace to improve compliance with relevant regulations and laws to reduce the associated costs, as compensation to involve workers to improve social responsibility for work endorses to increase productivity to increase the operations in the workplace and the line of rationalization, however, the basic idea is simple: prevent, instead of reacting, the dangers in the workplace. Some common health and safety polycs, or central approaches to occupational health and safety, are described below, with respect to the areas to which they belong. Management leadership The commitment of health and safety of employees must come from the main levels of management. This will help to ensure that employees are proactive to understand their responsibilities and, what is more important, the reasoning of them. In addition, employees can also increase employee consciousness to comply with security laws, reduce mental anxiety and stretch, reduce accidents and injuries and increase productivity. The minimal qualifications of an officer Health and safety are a diploma in environmental health or occupational safety, an occupational health teacher and related courses, and others are low low Health and Safety Law (OSHA). Communicating your responsibility to keep your works of work is not a very easy task, but it is very gratifying to see that all your hard work can be seen when your employees are very cautious when doing your job safely. Coordination and communication between the work sites where a company operates multiple work sites, it is especially important for the ampliation employer and all hired employers coordinate the planning. Check the previous findings of the investigation of injuries or disasters, observe the behaviors of employees in the workplace, consult supervisors, managers, employees and, especially to the maintenance and safety department, to provide information on their training issues. Discuss, there are also some issues of the security program in the workplace in which your organization can address, since these issues are applicable to any nature of the workplace. Evaluate that all training works for your colleagues requesting comments. A polythetic must be adopted to share that commitment to employees through comprehensive health and safety information. Occupational Security and Training in Health Formation of the planning tail files: 69 Kdownload8. Security Program Health Program Formatization of the tail of tail: 4 kdownload99. In formatization of health orientation and health safety orientation: 498 kdownload What is a health and safety training plan? for employees in any workforce to educate them with knowledge and skills to do their respective responsibilities safely. Managers of all levels must also provide resources to promote the health and safety of employees, which allows everyone to follow their company The worker's participation is important that workers participate in establishing objectives, identifying and informing the dangers and monitoring of progress in general. Of course, they must also be fully aware of how to fulfill their responsibilities, including the Available to help them do it. It is also important to have a clear opening policy to inform incidents and a very easy way to do so. Likewise, the workers of both parties must be informed (and evaluated for their knowledge of the dangers in each of the work sites in which they can work. The evaluation must be part of the plan, since it must verify that the plan is really following. Education and training Politics of training in health and safety is an integral part of any general plan. To this end, employers and employees must effectively cooperate to design appropriate measures to control hazards in the workplace. Time in time, it is also important to periodically evaluate the usefulness of these procedures and political. Doug Wakefield from Safe measure has developed this excellent manual, for many years, while providing health and safety consultant services and training in a variety of industries and at all organizational levels. To know how to plan a health and safety program, see the following tips and template samples of the health and safety training plan that are provided below. As a health and safety officer, it is your work to celebrate training for employees to know the safety problems related to the workplace. The participation of employees may also increase through simulation. Whatever the delivery format you decide to do, do not forget to investigate your material and master how to deliver it. The objectives are a way to motivate you and your employees to participate in the training program. In other words, employees must know the expectations and responsibilities of management, according to OSHA guidelines. The idea is to ensure that all understand how the program works and what their specific responsibilities are. Evaluate also how much your colleagues can understand and learn from your method by receiving some comments as well. Other aspects that you also need to evaluate are internal and external factors that may affectI'm not sure. ##### odnum le odot .sodot a etnerf otneimanertne us rech arap osoivren odaisamed esrenop o samet sus radivlo a jAraduya el otsE .aAug omoc olas esrasu ebed y ocir©Aneq otnemucod nu se etse :bew oitis us ne nAAtse sellated sus :guoD noc eseuqAnumoc .dadiruges y dulas ed rotlusnoC .opit etse ed otnemucod nu ragap ed atosc a nedlaper es arenam arto ed euq solleuga a raduya ed amrof us se etnematiutaryr elbinopsid ©Atse launam etse euq rech y so±Aad ed ovlas a sanosrep sal a renenam rop odanoisapa etnemadamertxe se guoD .ojabart ed ragul us ne narruco euq senoisel y sorgilep narruco euq ed dadililbaborp al runimisid a raduya edeup ,solneimanertne solse noc alpimuc odmauc .dadiruges y dulas ed samelborp revloser y racifinedi arap senoimuer ramargorp arap acilAlrop anu rebeltatse ebed eS .s)Am solcum y n'Aicazinagro al ed n'Aisnaxpe ,soreicamanif sotnusa ,sodaelpme sol ed dadiruges al ratocfa naArdop euq sosesocorp y sotneimidecorp sonugla albmac ,saniug)Am o sopiuge ,satneimarrhex savetm :Asu y Arpmoc etnemeteicer is euqifireV n'Aicamina o D3 sociiAArg omoc aAqoloncet ed osu le riuicni neduep otneimanertne ed sodot©Am sonugla ,rargol edeup es otse laue le rop odidem nu nos sacid°Arep y selaicni dadiruges y dulas ed sabeurp saL .7daolnwoDbK 233 :aloc ed salif ed n'AicazitamroF sonamuh sosrucebr ed dadiruges y dulas ed n'Aicaticapac .cte ,etnemlic)Af ragep y ratroc ,racifidom edeup es y arbalap ed otamrof ne jAtse otnemucod IE .ojabart ed ragul le ne sorgilep sol reconocer om°Ac ed aicneicnoC
